Continuing Education/Community Services Statistical Report

2010 - 2011

Executive Summary

I am pleased to release our annual Continuing Education/Community Services statistical report for the 2010 -11 academic year. Our mission and vision statements clearly state that HCC should be providing activities that engender and promote lifelong learning for all of our citizens. Moreover, our values statements also point out that HCC should always, ***“value and promote the process of reaching our individual and community-related potential through a life-long pursuit of education, both formal and informal”***. It is clear from our Mission and Values statements that we wanted this division to be intimately involved in ***“Creating Success – Hope, Opportunity, and Jobs”*** for our state and nation.

As previously noted in last year’s report, I wanted to see [statistically speaking] exactly what we were doing to carry out this part of our mission. I also want to find out how diverse are the continuing education, workforce development and community education initiatives currently in place to meet the current and future needs of the Roanoke Valley and the State of North Carolina. Dr. Palmer and her staff have just completed the second annual Statistical Report for 2010-11. I am pleased to provide you with a copy of the annual report from the division.

I continue to be amazed at the diversity of training and workforce development activities provided to our region by the continuing education/community services division. The report also delineates the critical role that Halifax Community College continues to play in the economic, social, educational and cultural development of the Roanoke Valley in general and our service region (Halifax and Northampton) in particular.

Our 2010-11 statistical report reveals that we had **12,023** student registrations that earned **14,213.5** credit hours. The division provided **249,925** membership hours of continuing education and earned **362.7 full-time equivalent (FTE)** student enrollments. The rich diversity of course offerings and training program included courses in Accounting, Automotive, Business and Finance, Basic Skills, Cabinetry, Computer,

Customized Training, Fire, Certified Nurse Aide, Inspections Coding, and Effective Teacher Training classes. Other training opportunities include Electrical Certification, Emergency Medical Services, Human Resources Development, Management, Leadership and Supervision, and Small Business Center activities. There were also numerous self-supporting courses provided by the division. In total, they offered courses in more than 33 distinct areas of interest and training, specifically, geared to workforce and economic development for our region.

Our Literacy Education Programs included Basic Skills, Adult Basic Education (ABE), General Educational Development (GED), Compensatory, and English as a Second Language served **1,907** students during this period. Our Fire, Emergency Medical Services, and Safety Programs served **4,006** students. Our Criminal Justice Training Program served **2,160** students and our Human Resources Development Program served **1,123** students in employability training and career development counseling to unemployed and underemployed individuals. Additionally, our Small Business Center served **1,070** students in a variety of training courses and business-related needs. In addition, I was very pleased to note that **857** students enrolled in a variety of self-supporting courses for 2010-11. The depth and breadth of services and courses provided by our Continuing Education and Community Services Division is truly amazing. Please review the entire report to get a full overview of the services provided by our Continuing Education and Community Services Division.

The Continuing Education and Community Services Division is always open to suggestions for new courses that meet the needs and interest expressed by our constituents in our service region. The leaders in the division are as follows:
